

Sauna Installation

Our home saunas are completely portable and assemble in minutes. Please note that the sauna should have a dedicated line and ground for best results. Results may otherwise be poor.

Step 1

Lay out the panels into the assembly format.

Step 2

Put the back wall into place on top of the floor pad.

Step 3

Attach either side to the back wall and then the other side.

Step 4

Bench mount easily onto the sauna. Wood panels are shaped snugly together for strength and durability.

Step 5

Assemble front panel to the two sides. The door is built into the panel.

Step 6

Put the top on top of the four walls.

Step 7

Attach all connecting A - A , B - B, etc.

Step 8

Leave the thermostat wire hanging loose.

Step 9

Put on the second top.

Step 10

You have just completed the assembly of your new infrared saunas. Plug it in and start enjoying it.
